

AugmentedArc®

Augmented Reality Welding System

Quick Specs

Processes

MIG (GMAW)
Flux-cored (FCAW)
Stick (SMAW)
TIG (GTAW)

Material Types

Steel
Stainless
Aluminum

Joints

Bead on plate, lap joint, T-joint,
butt joint, pipe-to-plate, butt
pipe, V-groove with backing
and V-groove without backing

Workpiece Positions

Horizontal
Vertical
Flat
Overhead

Input Power

115 V, 15 A, 60 Hz
230 V, 10 A, 50 Hz

Train. Transform. Inspire.

For beginner to advanced-level weld students, the AugmentedArc system simulates multiple welding processes, blending real-world and computer-generated images into a unique, augmented reality environment.

**Optimize
Instructor
Efficiency**

**Real-Time
Feedback**

**Minimize
Material
Costs**

**Reduce
Overall
Training Time**

Comes complete with:

- AugmentedArc simulator
- Teacher software (see page 2)
- OpenBook™ and NCCER materials (see contents at right)
- Black Infinity™ AR helmet with premium headgear
- Internal router
- MIG gun with AR nozzle
- SMAW stinger
- TIG torch with AR nozzle
- Two electrode/filler rods with AR tips
- Work stand for out-of-position applications
- Seven workpieces to simulate lap joint, T-joint, butt joint, pipe-to-plate, butt pipe, V-groove with backing and V-groove without backing

Includes the following: OpenBook™ GMAW, SMAW, GTAW theory content, quizzes and welding exercises, and National Center for Construction Education and Research (NCCER) Welding Levels 1–2 exercises.

NCCER

System is warrantied for one year, parts and labor.

AugmentedArc® Features

Optimize instructor efficiency by using the Teacher software to create a virtual classroom with customized curriculum, quizzes and weld exercises.

Real-time feedback is provided on users' technique to help correct errors. Reinforce proper welding practices and accelerate skill advancement prior to actual live arc welding in a lab.

Reduce overall training time compared to traditional methods, with the realistic welding simulation of the AugmentedArc.

Minimize material cost by saving wire, gas and workpieces in this simulation environment allowing students to refine their welding skills before beginning live arc welding.

Build a larger, more-skilled welding workforce when computer-savvy individuals are drawn to welding education programs that increase their success with live arc welding.

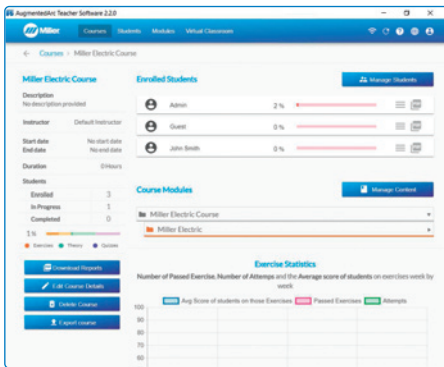

AugmentedArc simulator and helmet both feature augmented-reality displays.

Specially coded workpieces provide a wide range of training applications.

Specially designed gun, torch, stinger and filler metal components relay user data to the computer for processing.

AugmentedArc work stand allows for training in out-of-position applications.

Teacher Software

Teacher software is a user-friendly and flexible learning management system (LMS) that allows instructors to manage courses, content and students, and maximizes the usefulness of AugmentedArc welding simulators.

■ Create and manage your own welding curriculum

- Create quizzes, theories and welding simulation exercises
- Use pre-developed exercises or fully customize your own exercise parameters, technique and scoring criteria
- Offline mode allows you to manage the content from anywhere

■ Manage student progress

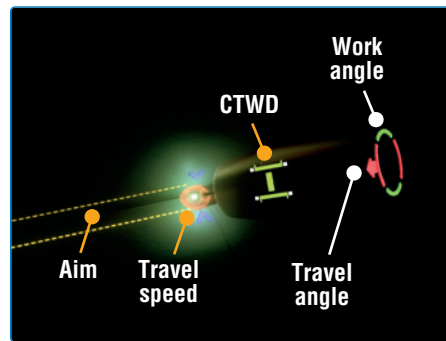

- Review the complete history and detailed results of student activities
- View real-time results of welding simulations
- View statistics and download reports for individual students or entire class

Augmented Reality Displays

AugmentedArc display

- Helmet's external optical sensor captures and sends images of coded devices and workpieces to AugmentedArc simulator
- Simulator generates three-dimensional images of metal workpieces, augmenting them into a real-world environment
- Display on simulator replicates the view inside helmet to give real-time feedback

Welding simulation screen

- Visual graphical aids guide the user to achieve target parameters
- Adherence to pre-determined or custom welding parameters is monitored, with confirmation when maintained or alerts when exceeded
- Realistic arc sounds from inside helmet speakers accompany the visuals for a truly immersive experience

Post-weld feedback screen

- User's performance is scored, graphed and recorded for playback
- Performance feedback on various parameters is provided
- Video is stored and available for replay for student and instructor review via teacher software

Genuine Miller® Accessories

AugmentedArc® Controller 301395

Provides the capability to link multiple AugmentedArc systems together into a virtual classroom environment. Includes Classroom router 278181.

Heavy-Duty Transportation Cases 951775

Includes two heavy-duty cases which provide rugged protection for the complete system during

transportation or storage. One case holds helmet and AugmentedArc unit, and the second case holds MIG gun, SMAW stinger, TIG torch, workpieces and work stand.

TIG Foot Pedal Kit 286033

Includes TIG foot pedal, connection cable and adapter cable.

Magnifying Lenses

212238 1.50
212240 2.00
212242 2.50

Magnetic Magnifying Lens Holder 286018

PARTS

CONFIGURATIONS

Lap and T-Joint Workpiece Kit 295835

Includes two workpieces that can be configured to simulate a lap or T-joint.

PARTS

CONFIGURATIONS

Pipe and Butt Joint Workpiece Kit 295836

Includes three workpieces that can be configured to simulate a butt joint, pipe-to-plate or butt pipe.

NCCER Workpiece Kit 288210

Includes two workpieces to simulate a V-groove with backing and a V-groove without backing.
